# AGRICULTURAL STATISTICS FOR ONTARIO, 1972

## CONTENTS

Map of Ontario, showing counties and districts.....	4
Introduction and Acknowledgments.....	5
Weather Conditions during 1972.....	6

### STATISTICAL TABLES

#### I - INCOME, PRODUCTION, PRICES AND PRICE INDICES

1. Gross value of agricultural production, cash receipts from the sale of farm products and total net income in Ontario, 1941 - 1972.....	8
2. Farm cash receipts from farming operations in Ontario, 1963 - 1972.....	9
3. Farm operating expenses and depreciation charges, Ontario, 1963 - 1972.....	10
4. Farm income in kind, Ontario, 1963 - 1972.....	11
5. Income of farm operators from farming operations, Ontario, 1963 - 1972.....	11
6. Farm cash receipts from farming operations for Canada and provinces, 1942 - 1972....	12
7. Index numbers of physical volume of agricultural production by province, 1935 - 1972	13
8. Average prices received by farmers in Ontario for specified field crops, monthly, 1971 and 1972.....	14
9. Average prices received by farmers in Ontario for specified livestock and livestock products, monthly, 1971 and 1972.....	15
10. Index numbers of farm prices of agricultural products for Canada and provinces, monthly 1972 and annually, 1953 - 1972.....	16
11. Index numbers of farm prices of agricultural products in Ontario, monthly (1943 - 1972)	17
12 (A) Eastern Canada farm input price indices, 1961 - 1972.....	18
(B) Eastern Canada farm input price indices, 1961 - 1972.....	19
(C) Eastern Canada farm input price indices, 1961 - 1972.....	20

#### II - SELECTED DATA FROM 1971 CENSUS

13. Ontario Census farms - Population, number, area, capital and expenditures, 1951, 1956, 1961, 1966, and 1971.....	21
14. Number and area of census and commercial farms in Ontario, by county, 1971 Census of Agriculture.....	22
15. Area of improved and unimproved farm land in Ontario, by county, 1971 Census of Agriculture.....	23
16. Acreage of improved farm land in Ontario, by county, Census 1951, 1956, 1961, 1966, and 1971.....	24
17. Acreage of improved pasture in Ontario, by county, Census 1951, 1956, 1961, 1966, and 1971.....	25

#### III - FIELD CROPS

18. Acreage, yield, production and farm value of principal field crops in Ontario, 1971 and 1972.....	26
19. Principal field crops: acreage and farm value in Ontario, 1942 - 1972.....	27

##### PRINCIPAL FIELD CROPS, individually, showing:

- Acreage, production and farm value in Ontario, by county, 1972	
- Acreage, production and farm value, Ontario, 1942 - 1972 and five-year averages	
20 & 21. Winter wheat.....	28, 29
22 & 23. Oats.....	30, 31
24 & 25. Barley.....	32, 33
26 & 27. Mixed grains.....	34, 35
28 & 29. Dry beans.....	36, 37
30 & 31. Soybeans.....	38, 39
32 & 33. Shelled corn.....	40, 41
34. Rye.....	42
35. Spring wheat.....	43
36. Flaxseed.....	44
37. Buckwheat.....	45
38. Dry peas.....	46
39. Field roots.....	47

## CONTENTS — Continued

	PAGE
40 & 41. Potatoes.....	48, 49
42 & 43. Fodder corn.....	50, 51
44. Hay.....	52
45. Hay and seeded pasture.....	53
46 & 47. Tobacco: flue-cured.....	54, 55
48 & 49. Tobacco: burley.....	56
50. Tobacco: dark.....	57

### IV — FRUITS AND VEGETABLES

51. Estimated acreage, production and farm value of specified commercial fruit in Ontario, 1971 and 1972.....	58
52. Estimated acreage, production and farm value of specified commercial vegetable crops in Ontario, 1971 and 1972.....	59
53. Commercial fruit production in Ontario, 1963 — 1972.....	60
54. Total acquisitions of Ontario-grown fruit and vegetable crops by all processing plants in Canada.....	60, 61
55. Average yearly prices received by growers for fruit crops in Ontario, 1942 — 1972.....	62

### V — LIVESTOCK

56. Volume of sales, by class, through community sales barns, 1964 — 1972.....	63
57. Number of livestock marketed in Ontario by county of origin, 1971 and 1972.....	64
58. Livestock: Number and farm value in Ontario, by county, June 1, 1972	
1. Bulls, one year and over.....	65
2. Cows for milk purposes, two years and over.....	65
3. Cows for beef purposes, two years and over.....	65
4. Yearling heifers for milk purposes.....	66
5. Yearling heifers for beef purposes.....	66
6. Calves, under one year.....	66
7. Steers, one year and over.....	67
8. Total cattle.....	67
9. Horses and ponies.....	67
10. Pigs, six months and over.....	68
11. Pigs, under six months.....	68
12. Total pigs.....	68
13. Sheep, one year and over.....	69
14. Lambs, under one year.....	69
15. Total sheep and lambs.....	69
59. Cattle: Number and farm value in Ontario, by class, June 1, 1943 — 1972.....	70
60. Horses, pigs, sheep and lambs: Number and farm value in Ontario, June 1, 1943 — 1972	71
61. Estimated production, farm value, and disposition of shorn wool in Ontario, 1944 — 1972	72
62. Monthly average price per 100 lb good feeder steers, Toronto, 1943 — 1972.....	73
63. Monthly average price per 100 lb choice slaughter steers, Toronto, 1943 — 1972.....	74
64. Monthly average price per 100 lb good and choice veal calves, Toronto, 1943 — 1972..	75
65. Monthly average price per 100 lb index 100, hogs dressed, Toronto, 1943 — 1972.....	76
66. Monthly average price per 100 lb good lambs, Toronto, 1943 — 1972.....	77

### VI — DAIRY

67. Estimated utilization of whole milk production in Ontario, 1968 — 1972.....	78
68. Per capita consumption of dairy products and margarine, Canada, 1960 — 1972.....	79
69. Population, total milk production, and milk production per capita in Canada and Ontario, 1943 — 1972.....	80
70. Milk production and utilization in Ontario, 1943 — 1972.....	81
71. Purchases of milk by dairies in Ontario, 1972.....	82, 83
72. Sales of milk and cream in specified areas of Ontario, 1972.....	84
73. Sales of fluid milk in Ontario, classified by type, 1962 — 1972.....	85
74. Production, utilization and farm value of milk in Ontario, 1970, 1971, and preliminary 1972.....	86, 87
75. Creamery butter production in Ontario, by area, 1972.....	88
76. Cheddar cheese production in Ontario, by area, 1972.....	89

## CONTENTS — Continued

77. Ontario production of processed milk products, monthly, 1972.....	90
78. Annual production of milk by-products in Ontario, 1968 - 1972.....	91
79. Monthly stocks of creamery butter and Cheddar cheese in Canada, 1954 - 1972.....	92
80. Exports of Cheddar cheese, butter, and concentrated milk products from Canada, 1954 - 1972.....	93
81. Milk shipments, by county of origin to milk processing plants in Ontario, 1972.....	94-96
82. Ontario production of specified dairy products, 1942 - 1972.....	97

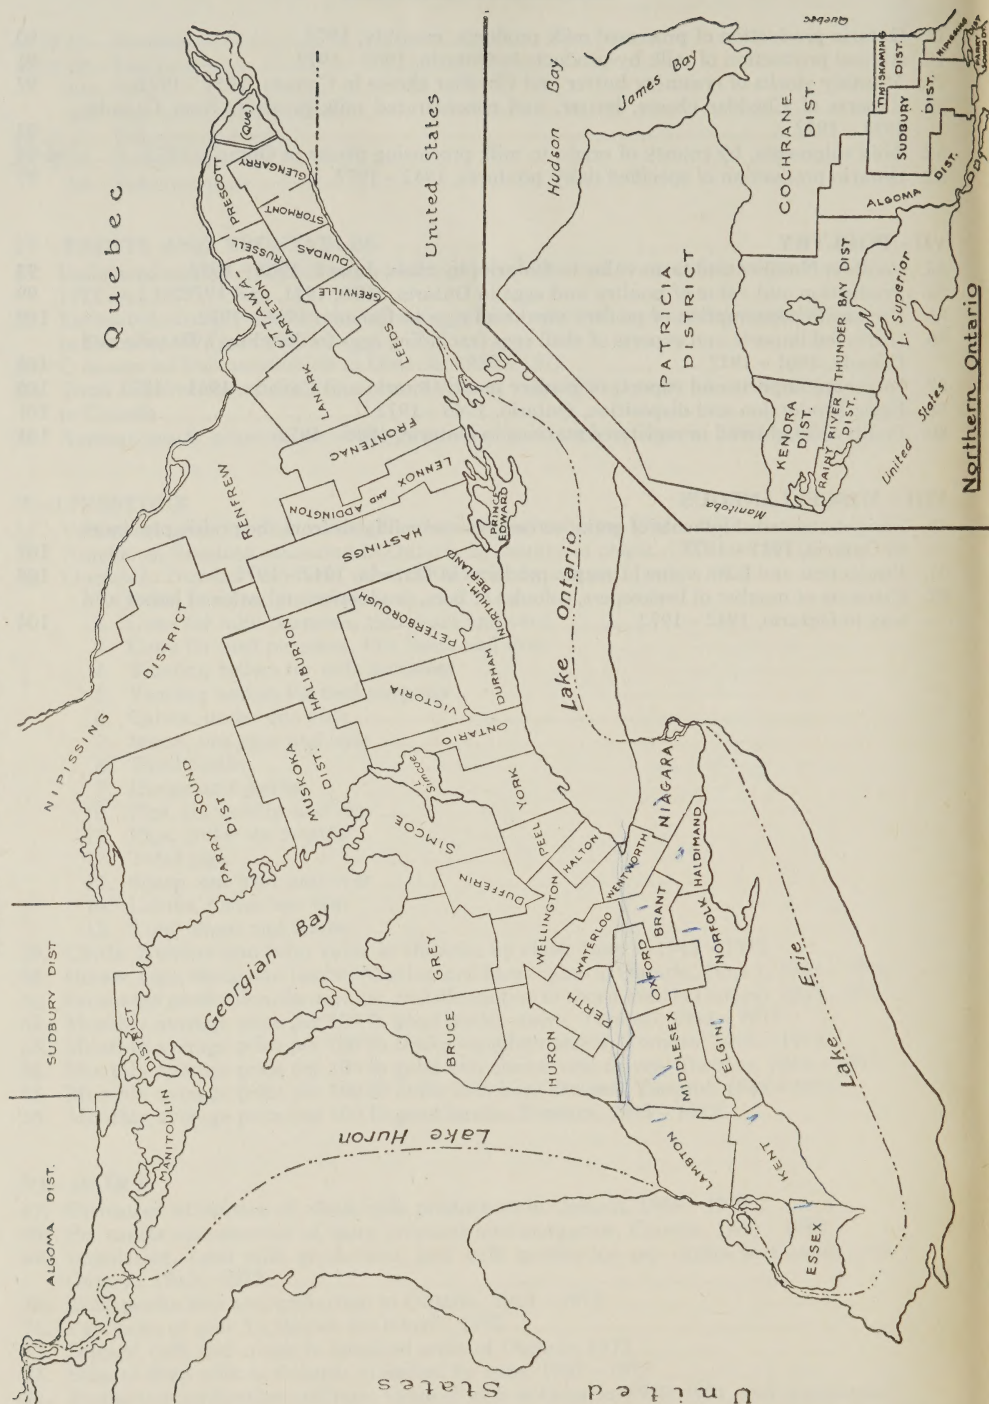

### VII - POULTRY

83. Poultry: Number and farm value in Ontario, by class, June 1, 1968 - 1972.....	98
84. Production and value of poultry and eggs in Ontario, 1970, 1971, and 1972.....	99
85. Per capita consumption of poultry meat and eggs in Canada, 1966 - 1972.....	100
86. Inspected imports and exports of shell eggs (excluding eggs for hatching), Ontario and Canada, 1961 - 1972.....	100
87. Inspected imports and exports of poultry meat, Ontario and Canada, 1961 - 1972.....	100
88. Eggs: Production and disposition, Ontario, 1966 - 1972.....	101
89. Poultry slaughtered in registered stations in Ontario, 1966 - 1972.....	101

### VIII - MISCELLANEOUS

90. Freight assisted shipments of grain, screenings and millfeeds from the prairie provinces to Ontario, 1941 - 1972.....	102
91. Production and farm value of maple products in Ontario, 1942 - 1972.....	103
92. Estimate of number of beekeepers, colonies of bees, production and value of honey and wax in Ontario, 1942 - 1972.....	104

# MAP OF ONTARIO

## INTRODUCTION

This is the ninety-first annual edition of *Agricultural Statistics for Ontario*. The Bureau of Industries, the first statistical agency of the Ontario Government, was set up in 1882 in response to a recommendation of the Royal Commission on Agriculture whose Report was published in that year. The Bureau was to provide agricultural statistics for Ontario, gathering information from farmers by means of questionnaires distributed by teachers to pupils and returned to them for forwarding to the Bureau.

The Report is compiled annually by the Statistics Section, Economics Branch, of the Ontario Ministry of Agriculture and Food to provide a useful reference for those engaged in various agricultural activities in the Province. Included are data describing production, value, consumption, expenditures and receipts. Data are prepared primarily by the Statistics Section in cooperation with the Agriculture Division of Statistics Canada and other government departments.

Data in this volume are derived from three major sources. First are those figures resulting from a complete count of a particular commodity such as quantity exported, imported, inspected by a government agency, or marketed only through a producers' marketing board. As well, data may be provided by the Census of Agriculture which is taken every five years, the latest available being June 1, 1971. Finally statistics may be calculated using an estimating procedure based on "bench mark" data from the Census and data gathered from sample surveys of farmers and others involved in agricultural industries.

Long-term tables in this edition begin in most cases with 1943. Data for prior years can be found in the 1966 and earlier editions of *Agricultural Statistics*.

Requests for additional information about tables which are credited to a particular agency should be sent directly to that organization. All tables for which no source is shown are prepared by the Statistics Section, Ontario Ministry of Agriculture and Food.

## ACKNOWLEDGEMENTS

The preparation of this report would not be possible without the valuable assistance of many of the people involved in the agricultural industry of Ontario. These include farm correspondents who report on agricultural conditions throughout the year; farmers who return farm survey schedules in June and December; manufacturers and processors of agricultural products; commodity marketing boards; Ontario Agricultural Representatives and other officials of the federal and provincial governments. Their contribution is gratefully acknowledged.

## WEATHER CONDITIONS DURING 1972

Winter in southern Ontario was characterized by light to normal snow cover, moderate to low temperatures and ample rainfall. Spring was late, cold and wet, preventing farmers from getting on the land, and making seeding nearly two weeks behind normal. Western Ontario experienced generally normal snowfall and temperatures during the early winter months. After January temperatures dropped considerably and many counties received more than average snowfall. Spring was late and excess moisture held up seeding operations. In Central Ontario winter came early, but remained relatively open until January; snowfall then increased, and temperatures dropped, prolonging winter to the end of March and making seeding later than normal. In Eastern Ontario heavy snowfall, followed by extreme fluctuations in temperature, created severe icing on hay fields; besides causing considerable damage to the hay fields, this extended the thawing time required and delayed land preparation. Winter started slowly in northern Ontario and became progressively more severe as weeks went by. Heavy snowfall and low temperatures were general throughout the area and there were reports of severe icing in some districts. On May 1 there was still frost on many fields and all were extremely wet.

Throughout April and the first half of May the temperature remained very cold, excessive moisture was a problem in all fields and planting was delayed by as much as two weeks. By mid-May conditions began to improve as temperatures climbed to the high 70's and low 80's. Soil dried very quickly under such conditions and seeding operations were at a peak within only a few days. Before the end of May the soil had dried to the point where the growth of wheat, pasture, hay fields and early spring crops had slowed noticeably. On May 30 and 31 rain spread throughout the Province, followed by two or three days of cloudy weather, which gave the moisture time to soak into the ground. This was followed by a few days of normal temperatures with scattered shower activity and plenty of sunshine.

June was cold and wet during most of the month. Heavy frost on the nights of June 10 and 11 did considerable damage in southwestern and central Ontario. The crops receiving the heaviest damage were tobacco, corn, tomatoes, soybeans and dry beans.

The weather in southern Ontario was characterized by cool, dry conditions in the first two weeks of June. Unusually wet weather followed the frost damage and growing conditions did not improve until the end of the month. Conditions in western Ontario were generally dry and cool in early June. Excessive rains came in the last half of the month, delaying haying operations in many areas. Moisture conditions in central Ontario were excellent in June; however, cold weather retarded the growth of some crops. Heavy rains during the last ten days of the month caused damage in many grain fields. Very heavy rains after mid-June provided eastern Ontario with excessive moisture conditions, with the result that farm work was at a standstill for almost a week. The whole area experienced below normal temperatures during most of the month. Weather conditions in northern Ontario varied considerably. Most northern districts had adequate moisture during June while temperatures generally were slightly above normal.

During July hot, humid weather prevailed over most of southern Ontario. Rainfall was adequate to more than adequate in all southern Ontario Counties, except Brant. Excessive rain caused some crop damage in Oxford county but

generally the most serious effects of weather during July were occasional interruptions in harvesting. During July hot weather prevailed in western Ontario with excessive moisture the first half of the month and dry conditions during the last half. Extreme temperature fluctuations caused by heavy shower activity were general throughout central Ontario during July. Rainfall was adequate to surplus but no water damage was reported. Excessive rainfall swamped most areas of eastern Ontario during July leaving a large acreage of hay still uncut by the end of the month. Many fields were still too soft to support the weight of farm machinery. Frequent rain fell over northern Ontario districts during July and caused numerous interruptions in haying. However, very little damage was caused by the rain.

During August weather conditions throughout Ontario were variable. Temperatures and humidity fluctuated rapidly as hot humid conditions gave way to cooling showers. In southern Ontario, Essex, Kent and Niagara South reported conditions as generally cool and wet while the remainder of the counties experienced great temperature fluctuations and wide variations in rainfall. In western Ontario humidity was high during August with frequent showers followed by cool temperatures. Central Ontario counties reported a general showery cool weather early in August but warmer during the later half accompanied by some sunshine. Most eastern Ontario counties experienced high temperatures, frequent rains, and very little sunshine during August. Temperatures and humidity remained high throughout northern Ontario. Rainfall was reported as more than adequate in all areas except Kenora.

Weather during September was seasonable in all counties in southern Ontario, except Essex, Kent and Lincoln which reported below average temperatures and Wentworth higher than normal temperatures. Western Ontario temperatures were average to slightly below average with some frost damage reported in Halton and Wellington counties. Uneven ripening and generally slow grain maturity were the most noticeable effects of the weather during August and September, however, by the end of September, Peel and Wellington counties were in need of some moisture. In central Ontario the weather was characterized by warm days and cold nights with a few rainy days followed by cooling temperatures. A late frost was felt in many low lying areas throughout the district but caused very little damage. During September eastern Ontario experienced generally favourable weather for growth and harvest. Little rain was reported except for Stormont. Temperatures were average to below average throughout northern Ontario during September while rainfall was adequate to excessive delaying harvest.

The weather in October was quite different from a year ago when conditions were generally ideal for farm work without killing frost. October 1972 was characterized by fairly sunny weather in the first week, a killing frost on October 10th and  $1\frac{1}{2}$  to 5" of rain in the last ten days of the month. Cloudy conditions prevailed in the last half of October, soil moisture reserves were adequate in southern Ontario, adequate to above normal in western and northern Ontario, and adequate to excessive in central and eastern Ontario. Excessive soil moisture was reported in Middlesex, Bruce, Durham, Muskoka, Parry Sound, Prince Edward, Renfrew, Russell, Stormont, Algoma and Nipissing.

TABLE 1 — GROSS VALUE OF AGRICULTURAL PRODUCTION, CASH RECEIPTS  
FROM THE SALE OF FARM PRODUCTS AND TOTAL NET INCOME  
IN ONTARIO, 1941-1972

Year	Unadjusted Gross Value <sup>1</sup>	Adjusted Gross Value <sup>2</sup>	Cash Receipts	Net Income
('000 dollars)				
1972.....	1,590,684	1,510,470	1,573,869	478,179

1942.....	410,996	395,631	357,848	225,633
1941.....	293,362	283,111	274,503	145,069

<sup>1</sup> Calculated by adding cash receipts from the sale of farm products, value of income in kind (excluding house rent) and the value of changes in farm inventories of field crops and livestock.

<sup>2</sup> Calculated by deducting from the unadjusted gross estimate the value of grain and livestock shipped from other provinces into Ontario for use in the agricultural productive enterprises of the Province.

\* Regional Municipality consists of what formerly was Lincoln and Welland counties.

<sup>1</sup> Census farms are defined as agricultural holdings of one acre or more with sales of agricultural products during the 12 months prior to June 1, 1971 of \$50 or more. This is the same definition that was used in the 1966 and 1961 Censuses.

<sup>2</sup> Commercial farms are defined here as census farms reporting \$2,500.00 or more of sales of agricultural products during the 12 months prior to June 1, 1971.
